# Matrix 4D

## A Disruptive Evolution

This state-of-the-art diode laser system is designed to deliver 3-dimensional hair removal results with high precision, speed, and safety.

### 4 Wavelengths

It combines 4 lasers in 1: Alex 755nm, Diode 808nm, Diode 940nm, Yag 1064nm, which releases quadruple wavelengths laser simultaneously to target different depths of hair follicles for more effective results.

### Powerful

It delivers Ultra Short Pulse to heat hair follicles uniformly to an optimal temperature without heating the epidermis. It provides maximum safety, comfort and efficiency treatments for all skin types.

### 2 Years Warranty

The premium quality laser generator is anti-condensation, dustproof and waterproof. It includes 2 years unlimited shots warranty.

### FAC Technology

The special optical design provides a collimated focused beam onto the skin, delivering deeper and more potent energy for more effective hair removal.

**Energy Adjustment**

**Pulse Width Adjustment**

**Frequency Adjustment**

**Real-time Temperature Monitoring**

## Silent Operation

Convenient insulation for silent working, make a more comfortable working environment for clients and operators.

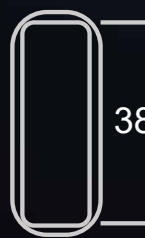

The high-end hollow wheels are silent and durable.

## 4 Treatment Heads

Multiple head sizes on a single handle, with a magnetic connection strong enough to resist the unintended disconnects. More choices for different body areas.

Large

13.5mm

Medium

13.5mm

## Much Faster

A unique applicator with an especially large spot size of 14x39mm.

This breakthrough applicator makes treatments much faster and pain free, ensuring a better experience for patients.

**40% FASTER**

Small

12.5mm

Ears/Nose

8.25mm

## Double Cooling Technology

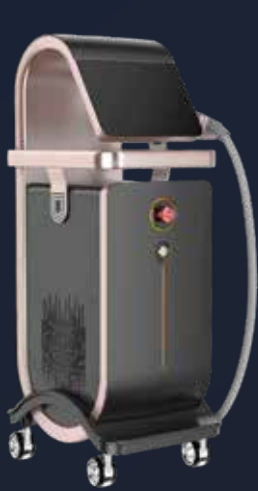

Powerful TEC cooling engines and 360° touch cooling head minimize the burning risk on the skin surface while maintaining the heat within the dermis where hair follicles are treated.
